

EX-2k-LD 2kW FM TRANSMITTER

The **EX-2k-LD** solid state VHF FM Transmitter is a new compact 3U, versatile and economical unit with an R.F. output in excess of 2kW, utilizing 2 x MRF1K50H 1500W LDMOS amplifiers, combined to provide 2kW O/P, with enough 'head-room' for high reliability in extreme temperature and VSWR conditions.

The **EX-2k-LD** includes a LED digital display showing the main parameters of the transmitter, to improve on-site monitoring, and studio style Left and Right VU meters for indication of the transmitted audio modulation levels, achieved by use of an integrated "stereo decoder".

The unit also provides exceptional stereo audio performance.

The **EX-2k-LD** includes an agile PLL synthesizer with local and remote frequency control making it suitable for 1+1 and N+1 operation.

The **EX-2k-LD** has an optional digital "stereo encoder" which includes an integrated audio limiter (supplied as Option 1). The audio inputs utilize professional balanced line XLR's.

The **EX-2k-LD** includes a wideband composite input and auxiliary input for RDS/SCA, both with external rear panel adjustment, Internal RDS encoder factory Programmed (Option 2) .
